7 July 2011

New Customer For Cairn Hill Ore

Iron ore producer, IMX Resources Limited (ASX:IXR) has contracted to sell two trial shipments of Cairn Hill magnetite – copper ore to a new Chinese customer.

The first of the shipments sailed from Port Adelaide on 1 July, with the second shipment due to be loaded in the second half of July.

The sale of a third shipment is in the final stages of negotiations.

Duncan McBain, Managing Director of IMX said “IMX is very pleased to have contracted another customer for our Cairn Hill ore. We look forward to developing a longer term relationship with this, and other, customers, as we look to expand our Cairn Hill / Mt Woods operations.”

The first phase of the Cairn Hill project is now close to producing at full capacity and is shipping two large panamax vessels per month to customers in China.

The Sichuan Taifeng processing plant has commenced commissioning and has produced its first concentrate. Despite the plant still being in the commissioning phase, the grade of the magnetite concentrate produced has been exceptional at between 70.3% - 70.6% Fe. This places the Bayuquan processing plant in a very strong position as one of very few plants in China that are able to produce a 70% plus Fe concentrate.

A handwritten signature in black ink, appearing to read "D. McBain".

About IMX Resources Limited

IMX Resources Limited (ASX:IXR) – is headquartered in Perth, Western Australia, is listed on the Australian Stock Exchange (ASX) with a current market capitalisation of approximately \$140m.

IMX is an active diversified mining company with a mining project in South Australia, and exploration projects in South Australia, Tasmania, as well as Tanzania and Mozambique in East Africa, focusing on a range of commodities including iron-ore, nickel, gold, copper.

The company is disciplined in following a careful strategy to maximise shareholder value by discovering and developing ore bodies. IMX achieves this by participating in multiple, quality exploration projects in joint ventures with global mining companies, and by listing spin-off companies, to ensure programs with high potential are well-funded, while retaining a significant interest to provide exposure for IMX shareholders.

IMX owns 51% of the Cairn Hill project, 55 kilometres south-east of Coober Pedy, South Australia close to the Darwin - Adelaide railway. Phase 1 is a unique magnetite Fe – Cu – Au DSO project. The ore produces a premium coarse grained magnetite product, with a clean saleable Cu / Au concentrate. IMX has a Phase 1 life of mine sales offtake agreement with the Sichuan Taifeng Group. A Phase 2 resource is expected around the end of Q2 2011 with the aim of an accelerated development program. Phase 2 is a high grade magnetite project where production of a saleable \pm 60% Fe intermediate concentrate using dry magnetic separation is planned.

IMX owns 100% of the iron ore rights on the Mt Woods tenements where besides the potential of Phase 3 magnetic anomalies outside ML6303, recent drilling has intersected magnetite to the south and west of Cairn Hill with target mineralisation of 320-550mt @ 25-35% Fe based on the drilling, ground gravity and aeromagnetics.

The immediate upside for Cairn Hill / Mt Woods remains the definition of further resources to support a long term 3-5mtpa iron ore operation.

IMX has a joint venture with OZ Minerals for the non-iron ore rights on its Mt Woods tenements. OZ Minerals has 51% of the joint venture and must spend \$20m over 5 years to retain this interest. OZ Minerals is targeting Prominent Hill style copper / gold mineralisation.

In Tanzania, IMX holds 100% of the Mibango nickel / copper / platinum project.

IMX spun off 70% of the Nachingwea Nickel - Copper project in Tanzania into a Continental Nickel Limited (TSXV:CNI) in August 2007. IMX currently holds 37.0% of Continental Nickel and retains a 25% interest in the Nachingwea Nickel - Copper project through a joint venture company structure. The Measured and Indicated Resources at Ntaka is 3.683Mt at 1.52% Ni, 0.28% Cu and 0.05% Co (at a US\$80/tonne NSR cut-off). In addition Inferred Resources, which are dominated by the new Sleeping Giant discovery, total 10.9Mt at 0.98% Ni and 0.22% Cu. The contained nickel in all resource categories totals 161,800 tonnes.

IMX owns 27.3% of Uranex (ASX:UNX), a spin-off from IMX, which is dedicated uranium company with assets in Australia and Tanzania.
