Appointment of Acting Chief Executive Officer

Iron ore producer and explorer, IMX Resources Limited (ASX:IXR) advises the appointment of Mr. Andrew Steers as Acting Chief Executive Officer with immediate effect, following the resignation of Managing Director, Duncan McBain. Mr. Steers is currently the Company's Chief Financial Officer and Company Secretary, and has been an integral part of the Group's executive management.

Chairman Johann Jacobs said "The appointment of Andrew in this acting position will allow the business to continue to advance its current initiatives, whilst allowing the Board to continue its search for a new Managing Director."

A handwritten signature in black ink, appearing to be "J. Jacobs", written over a large, stylized oval scribble.

JOHANN JACOBS
CHAIRMAN

About IMX Resources Limited

IMX Resources Limited (ASX:IXR) – is headquartered in Perth, Western Australia, is listed on the Australian Stock Exchange (ASX) with a current market capitalisation of approximately \$110m.

IMX is an active diversified mining company with a mining project in South Australia, and exploration projects in South Australia, Tasmania, as well as Tanzania and Mozambique in East Africa, focusing on a range of commodities including iron-ore, nickel, gold, copper.

The company is disciplined in following a careful strategy to maximise shareholder value by discovering and developing ore bodies. IMX achieves this by participating in multiple, quality exploration projects in joint ventures with global mining companies, and by listing spin-off companies, to ensure programs with high potential are well-funded, while retaining a significant interest to provide exposure for IMX shareholders.

IMX owns 51% of the Cairn Hill project, 55 kilometres south-east of Coober Pedy, South Australia close to the Darwin - Adelaide railway. Phase 1 is a unique magnetite Fe – Cu – Au DSO project. The ore produces a premium coarse grained magnetite product, with a clean saleable Cu / Au concentrate. IMX has a Phase 1 life of mine sales offtake agreement with the Sichuan Taifeng Group. A Phase 2 resource is expected around the end of Q2 2011 with the aim of an accelerated development program. Phase 2 is a high grade magnetite project where production of a saleable \pm 60% Fe intermediate concentrate using dry magnetic separation is planned.

IMX owns 100% of the iron ore rights on the Mt Woods tenements where besides the potential of Phase 3 magnetic anomalies outside ML6303, recent drilling has intersected magnetite to the south and west of Cairn Hill with target mineralisation of 320-550mt @ 25-35% Fe based on the drilling, ground gravity and aeromagnetics.

The immediate upside for Cairn Hill / Mt Woods remains the definition of further resources to support a long term 3-5mtpa iron ore operation.

IMX has a joint venture with OZ Minerals for the non-iron ore rights on its Mt Woods tenements. OZ Minerals has 51% of the joint venture and must spend \$20m over 5 years to retain this interest. OZ Minerals is targeting Prominent Hill style copper / gold mineralisation.

In Tanzania, IMX holds 100% of the Mibango nickel / copper / platinum project.

IMX spun off 70% of the Nachingwea Nickel - Copper project in Tanzania into a Continental Nickel Limited (TSXV:CNI) in August 2007. IMX currently holds 37.0% of Continental Nickel and retains a 25% interest in the Nachingwea Nickel - Copper project through a joint venture company structure. The Measured and Indicated Resources at Ntaka is 3.683Mt at 1.52% Ni, 0.28% Cu and 0.05% Co (at a US\$80/tonne NSR cut-off). In addition Inferred Resources, which are dominated by the new Sleeping Giant discovery, total 10.9Mt at 0.98% Ni and 0.22% Cu. The contained nickel in all resource categories totals 161,800 tonnes.

IMX owns 26.6% of Uranex (ASX:UNX), a spin-off from IMX, which is a dedicated uranium company with assets in Australia and Tanzania.
