QUARTERLY ACTIVITIES REPORT

Quarter ended 31 December 2017

EXPLORATION and DEVELOPMENT

Exploration in Tanzania

Exploration in Tanzania remained on hold, pending clarification of the implications of legislation relating to the legal and regulatory framework for the natural resources sector in Tanzania that was passed by the Tanzanian Parliament in July 2017 (the '**July 2017 Legislation**') and the release of the Mining Regulations 2018 (the '**Regulations**') in January 2018.

Previous exploration carried out in the September Quarter confirmed the prospectivity of the Naujombo South gold target. Gold anomalism was detected on all three lines of air core drilling (spaced over 600m), with three holes in particular, intersecting strong levels of anomalous gold mineralisation¹:

- NAC17-014: 3m @ 1.01 g/t Au from 15m (within a larger 19m @ 0.293 g/t Au from 11m);
- NAC17-015: 8m @ 0.79 g/t Au from 25m (within a larger 44m @ 0.372 g/t Au from 4m); and
- NAC17-018: 3m @ 0.84 g/t Au from 16m.

Naujombo South is a highly prospective gold target that warrants further exploration, however with the current uncertainty associated with the July 2017 Legislation and the Regulations, the Company cannot justify the allocation of capital to such exploration.

Project generation activity

With exploration in Tanzania on hold, the Company has committed to securing a project in another jurisdiction. During the Quarter, project review activities commenced and have focused on lithium, and base and precious metal opportunities. The Company remains committed to acquiring such a project and is currently conducting preliminary due diligence on three potential opportunities.

Ntaka Hill Retention Licence

The Regulations, as they relate to mining rights, include a provision that all retention licences issued prior to the date of publication of the Regulations are cancelled and cease to have legal effect. The Company's interest in the Ntaka Hill Project has been held in the form of a retention licence ('**Ntaka Hill Retention Licence**'). The Ntaka Hill Retention Licence was validly granted on 21 April 2015 for a period of five years. Given that there has been no breach of the conditions of the Ntaka Hill Retention Licence or failure to comply

with the Mining Act or the applicable regulations, Indiana would be surprised if it was not offered an alternative class of licence.

Following recent discussions with the Ministry of Minerals, the Company has been requested to make a submission regarding its Ntaka Hill Retention Licence. While the Company believes it may have rights to international arbitration relating to any impact of the Regulations on the Ntaka Hill Retention Licence pursuant to a bilateral investment treaty between the Government of Tanzania and the Government of the United Kingdom, the primary focus is on reaching a satisfactory outcome with the Government of Tanzania.
